

Marijuana Toxicity

THC (Tetrahydrocannabinol) is a chemical compound found in the marijuana plant, most commonly known for its psychoactive effect on humans. Unfortunately, THC is extremely toxic for pets, causing balance problems, irregular heartbeat, breathing problems, incontinence, or worse.

Trupanion has already paid more than \$250,000 in marijuana toxicity related claims in North America. Here are some of the pets with claims for marijuana ingestion:

Pet Name	Breed	City	Claim Amount
Berkley	Newfoundland	Calgary, AB	\$4,039
Ariel	Mixed Breed	Woodbridge, ON	\$2,373
Sherlock Holmes	Blue Tick Coonhound	Calgary, AB	\$1,806
Skye	Mixed Breed	Calgary, AB	\$1,681
Lucy	Australian Shepherd	Calgary, AB	\$1,332

PROTECT YOUR PET BY KEEPING MARIJUANA OUT OF REACH.
